APOORV VERMA

Boston, MA • (978) 930-7023 • apoorv@bu.edu • apoorvverma.com • linkedin.com/in/apoorvv

Full-Stack Software Engineer with experience building high-throughput, cloud-native platforms (**500+** RPS, **40K+** daily transactions). Specialized in API design, async systems, performance optimization, and AI-integrated product delivery.

EDUCATION

Master of Science in Computer Information Systems **-** Boston University (**GPA: 3.81/4.0**) *Boston, USA* **| *May 2025***

- Teaching Assistant for: **Artificial Intelligence & ML** and **Data Science with Python**

EXPERIENCE

Software Engineer, AI Solutions **-** *Luminiphi Labs* *Boston, USA* **| *Aug 2025 – Present***

- Developed and scaled a high-concurrency appointment booking system leveraging Node.js, PostgreSQL (RDS), Redis, and SQS, handling **40,000** daily bookings at **500 RPS** peak with **200ms p95** latency and less than **0.1%** booking conflicts.
- Built a real-time collaboration suite with Node.js, Socket.io, Next.js, and serverless AWS services with Twilio (TwiML, TaskRouter), contributing to a **65%** subscriber increase within **two** weeks of launch.
- Implemented LLM-as-a-Judge evaluation framework to benchmark model outputs, reducing hallucination rates by **70%**.

Software Engineer II **-** *Gytworkz Technologies* ***Apr 2022 – Dec 2023***

- Modernized a legacy stack to Node.js (TypeScript), Next.js (Tailwind CSS + Shadcn) and PostgreSQL, achieving Server-Side Rendering (**SSR**) to boost First Contentful Paint (**FCP**) and improving API execution speeds by **40%**.
- Migrated infrastructure from AWS CloudFormation to Terraform, eliminating cross-environment configuration drift across **6** staging and production environments and reducing environment provisioning time by **50%**.
- Architected an enterprise fleet management platform, integrating PostGIS, Sentiance SDK with a React/Mapbox frontend to visualize real-time telemetry for **5,000+** vehicle trips, providing analytics that slashed road incidents by **73%**.
- Orchestrated containerized microservices on Docker and Kubernetes (EKS & GKE), implementing end-to-end observability using Prometheus and Grafana to monitor **p95/p99** latency, error rates, and service health.

Software Engineer **-** *Gytworkz Technologies* ***Jul 2021 – Apr 2022***

- Launched a custom CRM system handling **5,000+** MAU, implementing granular **RBAC** (Twilio, AWS SNS, SQS, Lambda, Pinpoint), securing API endpoints (**JWT**) and dynamically rendering UI components in React based on user permissions.
- Optimized PostgreSQL query performance through indexing, reducing API response times by **35%** under high traffic.
- Automated **CI/CD** pipelines with Jenkins & GitLab, orchestrating Docker image builds and automated test suites with Infrastructure-as-Code via AWS CloudFormation, cutting deployment times by **60%**.

Software Engineer **-** *Digital Projekt* ***Jul 2020 – Jul 2021***

- Revamped an inspection application with React & Node.js, trimming retrieval latency by **35%** for a fleet of **3k+** vehicles.
- Established a frontend testing strategy with Jest, React Testing Library (with Playwright), reducing UI regressions by **40%**.

ACADEMIC PROJECTS

Hitchiked.com **-** *A carpooling platform matching drivers with empty seats to nearby riders.* ***May 2025***

Built using **Next.js**, **Node.js, PostgreSQL, Sockets, GCP & Maps SDK** featuring fare negotiations & serving **200+** beta users.

MenuGenie **-** *A pipeline that OCRs menu photos into clean JSON and detected allergens via NER.* ***Dec 2024***

Created with **FastAPI**, **HuggingFace (LayoutLMv3)**, and **PostgreSQL** that generated outputs with **94%** extraction accuracy.

SKILLS

Languages & Frameworks: Typescript, Javascript (Node.js, React, Next.js), Python (FastAPI), Shadcn, Tailwind CSS, Redux
Cloud & Infrastructure: AWS (CloudFormation, Lambda, SQS, SNS, EC2), GCP, Azure, Terraform, Docker, Kubernetes
Databases & Storage: PostgreSQL, PostGIS, MySQL, Redis, DynamoDB, MongoDB, NeonDB, Supabase
AI, ML & Tools: LangChain, Pinecone, LLMs, Hugging Face Transformers, AI Agents, OpenAI API
Testing, CI/CD: Git, Jest, Playwright, React Testing Library, Jenkins, Jira, GitLab CI, Grafana, Prometheus
